*“Research associate in synchrotron radiation and surface science”*

My work, in collaboration with Diamond Light Source (Oxfordshire, UK), consists in managing and supervising experiments carried out with synchrotron radiation at DLS, ESRF and SOLEIL by the Thornton group (UCL). It includes part of the conception of the photoelectron-chemical cell for SXRD involved in this project. In addition, I am in charge of experiences and experimental devices in the surface laboratory of the chemistry department of UCL and the day-to-day supervision of three PhD students.
